Art Unit: 2879

1. The indicated allowability of claims 1, 3, 7, 8, 11, 12, 14, 15, and 17 is withdrawn in view of the newly discovered reference(s) to Co-pending U.S. Patent Application Serial No. 09/877,509. The Finality of the rejection is withdrawn. Rejections based on the newly cited reference(s) follow.

2. Claims 1, 3, 7, 8, 11, 12, 14, 15, and 17 of this application conflict with claims 2, 4, 14, 17, 21, 22 and 26 of Co-pending U.S. Patent Application Serial No. 09/877,509. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional

rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, 3, 7, 8, 11, 12, 14, 15, and 17 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2, 4, 14, 17, 21, 22 and 26 of copending Application No. 09/877,509. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 2, 4, 14, 17, 21, 22 and 26 recite applicant's claimed cathode plate including cathode substrate, one or more linear isolation barriers, one or more electron emitter lines, gate wires and a gate structure as follows.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

5. Claims 4-6 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior art of the record does not disclose applicant's claimed cathode display of claim 1 further including: (a) trenches as recited specifically in claims 4-6, and (b) a display screen and phosphor lines as recited in claim 21.
